Address : Klang, Selangor.

SUMMARY

A high-achieving and innovation-driven **Computer Science (Software Development) undergraduate** with an outstanding **CGPA of 3.93 and consistent Dean's List (Sem 1–5)**, recognized as **Best Program Student** and **multiple international award winner** in **innovation competitions**. Equipped with hands-on experience in **Laravel, PHP, database management, and system architecture**, complemented by strong analytical thinking and stakeholder communication skills. **Highly motivated to secure an internship placement (21 September 2026 – 20 March 2027)**, aiming to contribute technical expertise, creative solutions, and high-performance work ethic to support organizational digital transformation and system optimization initiatives.

EDUCATION

Universiti Sultan Zainal Abidin (UniZA)

(Oct 2023 - Present)

Bachelor of Computer Science (Software Development) with Honours | **Current CGPA: 3.93 | Dean's List (Semester 1 – 5)**

Final Year Project (FYP): Smart Maintenance Request System for Condominium (CondoFix) with Scheduling Algorithm

Politeknik Tuanku Syed Sirajuddin (PTSS)

(June 2020 – Dec 2022)

Diploma in Information Technology (Technology Digital) | **CGPA: 3.89 | Dean's List (Semester 1 – 5)**

Final Year Project (FYP): Plant Growth Monitoring System with Augmented Reality (AR) Dashboard

WORKING EXPERIENCE

1. Pejabat Setiausaha Kerajaan (SUK) Perlis

(Jan 2023 – June 2023)

Industrial Intern

- Engineered and delivered a full-stack web application (SPPP System) from concept to deployment, streamlining internship application processes and improving administrative efficiency by 80%, enabling faster and more structured candidate management.
- Architected robust front-end and back-end functionalities using Laravel and PhpStorm, demonstrating rapid adaptability to new technologies and reducing development turnaround time while maintaining high system performance.
- Executed comprehensive system testing, debugging, and root-cause analysis, successfully identifying and resolving 95% of system errors, significantly enhancing system reliability, stability, and user experience.
- Analyzed user requirements and translated them into functional system improvements, increasing system usability and workflow efficiency by 70% through iterative enhancements and feature optimization.
- Presented system functionalities to stakeholders and decision-makers, effectively communicating technical concepts, securing positive feedback, and achieving 100% acceptance rate for implemented features.
- Collaborated with internal departments and end-users, ensuring alignment between system capabilities and operational needs, which resulted in improved process transparency and reduced manual workload.

KEY ACHIEVEMENTS

Degree Level

- Recognized as **Best Program Student** (Semester 1, 2024/2025 Session)

(2024 – 2025)

Diploma Level

- Secured 1st Place (Gold Award)** at the 1st International SBM Innovation Competition 2022 **(2022)**
- Received The Choice of Jury Award** for 1st International SBM Innovation Competition 2022 **(2022)**
- Awarded The Best Young Inventor Award** for 1st International SBM Innovation Competition 2022 **(2022)**
- Achieved Champion (1st Place)** in INNOCOM 2022 FYP Competition, (Plant Growth Monitoring System With Augmented Reality (AR) Dashboard) **(2022)**

LEADERSHIP EXPERIENCES & INVOLVEMENTS

Degree Level

- Selected as Faculty Representative for International Mobility Program** at Universitas Pembangunan Nasional "Veteran" Jakarta, demonstrating strong academic credibility and global exposure readiness.
- Actively contributed to sustainability initiatives (Hot Spring Cleanup Program)**, supporting environmental conservation efforts and promoting eco-awareness among communities.
- Engaged in humanitarian volunteer work (Projek Kaseh Gelandangan)** with BeKind Malaysia, delivering aid and support to underserved communities while strengthening social responsibility and empathy.

Diploma Level

- **Coordinated stage setup and certification logistics** for the 14th PTSS Convocation Ceremony, ensuring 100% smooth execution of event operations involving large-scale participant management.
 - **Managed financial planning as Program Treasurer**, controlling budget allocation and reducing unnecessary expenses by 30% through efficient cost tracking and financial oversight.
 - **Participated in national-level volunteer programs (World Cleanup Day 2020 & 2022)**, contributing to environmental sustainability initiatives and community engagement efforts.
-

SKILLS

- **Technical skills:**
 - **Programming & Development:** C++, Java, PHP, HTML
 - **Framework & Tools:** Laravel, PhpStorm
 - **Database Management:** MySQL, Oracle (Database design, query optimization, data structuring)
 - **Software Development:** Full-stack development, system architecture design, debugging & testing, requirement analysis
 - **UI/UX & System Optimization:** User-centric design, workflow improvement, usability enhancement
 - **Microsoft Office Suite:** Advanced Excel (data handling), Word (documentation), PowerPoint (professional presentation)
 - **Multimedia & Design:** Adobe tools (basic UI/visual design support)
 - **Soft skills:**
 - **Problem-Solving Excellence** – Diagnosed and resolved up to 95% of system errors, demonstrating strong debugging capability and root-cause analysis in high-pressure environments.
 - **Effective Communication & Presentation** – Delivered technical system presentations to stakeholders with 100% acceptance rate, simplifying complex concepts into clear, actionable insights.
 - **Adaptability & Fast Learning Ability** – Rapidly mastered new technologies (Laravel, PhpStorm, AR integration), reducing development turnaround time and improving system delivery efficiency.
 - **Attention to Detail** – Ensured high system accuracy, stability, and user experience through rigorous testing and validation processes.
 - **Languages:** Malay (**Native**) and English (**Intermediate**)
